

SIBO Breath Gas Analysis Testing

Delay in the Delivery of Results

Mainz, 29th September 2026

Dear colleagues,
dear members of the medical practice team,

Due to equipment failures, there are currently significant delays in the measurement of SIBO breath tests. This has resulted in an extension of the analysis time to approximately **15 working days**. A further increase in turnaround times is expected at present, at least until mid-October 2026.

We therefore recommend that non-urgent breath gas samples be sent at a later date.

The following analyses are affected:

- 3605 **Lactulose Test**
- 3604 **Glucose Test with Hydrogen**
- 5586 **Glucose Test with Methane and Hydrogen**

Thank you for your understanding.

Do you have any questions or would you like to order sampling materials?

Our customer service team will be happy to help you via email at international@ganzimmun.de
or by phone on +49 6131 7205-0, Monday to Friday between 8 a.m. and 7 p.m.

With collegial regards

Dr. med. Patrik Zickgraf
Medical Director
