Current Information
for Referrers

Thyroglobulin (9244) and ß-hCG (5799)

Optimisation of the Testing Procedure and Sample Material

Mainz, 21th October 2026

Dear colleagues,
dear members of the medical practice team,

we are pleased to inform you that, as of **16th November 2026**, the stability of the tumour markers **thyroglobulin and hCG (total, including β-subunits)** has been significantly improved as a result of optimisations to the testing procedures.

Consequently, frozen samples no longer need to be sent by express delivery from 16th November 2026. From this date onwards, centrifuged serum samples can be submitted for both parameters.

Both parameters are processed on the same day.

Please note that the reference ranges will also be adjusted as part of the transition to the new testing procedures. The current reference ranges can be found in the test report.

Billing for these tests remains unchanged.

Do you have any questions or would you like to order sampling materials?
Our customer service team will be happy to help you via email at international@ganzimmun.de
or by phone on +49 6131 7205-0, Monday to Friday between 8 a.m. and 7 p.m.

With collegial regards

Dr. med. Patrik Zickgraf
